Waxes

Water based resins

Market segments

Barentz is organised by end-use categories. This means that you will always be dealing with a specialist that understands your line of business. Our knowledge of your business will help you to achieve your goals, whether it is about reducing costs or realising successful product innovations.

Barentz operates in the following market segments:

- Bakery, chocolate and sugar confectionery
- Dairy and beverages
- Babyfood
- Flavours
- Meat, fish and poultry
- Snacks
- Preserves, condiments and ready meals
- Feed and petfood
- Nutraceuticals and fortified foods
- Pharma
- Cosmetics and personal care
- Cleaners and adhesives
- Coatings and inks
- Paper and cardboard
- Polymers and fine chemicals
- Composites and construction
- Textile

Whether for food or non food, for each of these segments Barentz offers a wide portfolio of speciality ingredients and additives, which offer solutions for your industry.

BARENTZ
RAW MATERIALS

Business made simple

Founded over half a century ago, Barentz has developed into one of Europe's leading sales-, marketing and distribution companies of raw materials for the processing industry. The Barentz portfolio of speciality ingredients and additives, the penetration and the coverage in the end use segments and the European coverage, make Barentz a truly unique partner in the business to business value chain.

The Barentz way of doing business is based on a few very solid principles:

1. Barentz is the exclusive distribution channel for our suppliers.

We are proud to present ourselves as the exclusive local sales office in every aspect. Our power is our knowledge of the market and our ability to translate that to sales and relationships in the marketplace.

2. We are doing business with a long-term view.

Continuity is a key word in the Barentz vocabulary. Our relationships are based on trust, expertise and confidence.

3. The secret of our success lies in our employees.

That is why we keep on investing in the very best part of our company: our people. We aim to provide the very best service in our business. Our people make that happen.

4. Logistics is a key element in our service.

Simplicity and ease of physical distribution, cost-effectiveness, timely delivery and quality of performance are the yard stick with which we like to be measured. We are continuously striving to optimise the chain and we use the most modern tools including EDI and internet to realise these goals.

5. Think global, act local.

With our suppliers on the 5 continents and our customers throughout Europe we take a truly global view on the supply chain. However, we will serve you with intimate knowledge of the local situation, speak your language and share your cultural heritage and we are located near you.

As Barentz operates in many markets, we can provide our suppliers and clients with regular and sound analyses of the market and product developments. The professionalism of Barentz gives you access to knowledge and experience not just in technology and products, but also in legislation, legal and tax issues, product development and innovation. The fact that we work with thousands of products gives you a key synergistic advantage: one stop shopping.

**Barentz truly is:
Business made simple.**

The history of Barentz

Mr H.L. Barentz established Barentz Chemische Grondstoffen BV in Amsterdam in 1953. Within the first decades of its existence, the company grew quickly and developed successfully into one of the leading suppliers of industrial raw materials on the Dutch market.

The establishment of Barentz NV in Zaventem, Belgium, in 1988 saw the opening of our first foreign office, which also marked the beginning of Barentz's international expansion in Europe.

Throughout the years, Barentz established subsidiaries in Germany, Czech Republic, Slovakia, Poland, France, Bulgaria, Hungary, Romania, Spain, Portugal and Mahreb countries, Russia, the Nordic countries, United Kingdom and the P.R. of China.

Other offices in Europe are planned and preparations are now in full swing. Continuity and growth have been our drivers for the past 50 years, they will continue to be our drivers for the future.

Barentz Ingredients

Barentz Ingredients is producing functional blends and flavours for the food industry in general and the meat, fish & poultry sectors more specifically.

Barentz Ingredients became part of the Barentz group of companies in April 2002 and is located in Almelo, The Netherlands.

The focus of Barentz Ingredients is to provide our customers with tailor made solutions and therefore a high added value. We do this by building long-term, strong and transparent relationships with our customers, suppliers and agents, based on our technological expertise, knowledge of raw materials, service and trust.

In practice this policy amounts to direct contact with existing and potential clients. The first introduction to Barentz Ingredients, our products and possibilities, is to agree on a testing procedure either at our base in Almelo or at the

customer's premises. In Almelo fully equipped pilot as well as laboratory facilities are available for customers to test and approve products in their final application. New raw materials and concepts are constantly being evaluated. A close association in the follow-up phase is necessary to achieve a reasonable chance of success. The realisation of a confidential relationship with a client is essential in this regard.

Production is done in a state-of-the-art factory and Barentz Ingredients complies with the latest requirements regarding quality control and quality assurance.
